

**Central Library and Information Centre**

**Integrated Library Management System (ILMS)**

An Integrated Library Management System is a computer-based system used to manage internal and external resources. It performs library automation and collection development tasks broken down into different modules that are focused on simplifying tasks such as acquisition, cataloguing, and circulation commonly done in any library. It is built on a centralized database and normally utilizes a common computing platform and consolidates all library operations into a uniform and enterprise wide system.

**Nature of Automation:** Fully Automated 8.2 Version since 2016 onwards. Library housekeeping activities such as data entry, issue and return and renewal of books, member logins, online book reservation, report management, acquisition control systems, articles indexing system, e-resources linkage through remote access, serial control systems Report generation, User rate analysis, User data Maintenance, Storage and retrieval of data, Improved Student Service, Cataloguing Improvements, selective dissemination of information, article alert service etc. carried out through ILMS, AutoLib and Web OPAC.

## 2. Search (OPAC)

This module is designed to search all the **above databases** using important fields and print the search results in any desired format/order.

Online Public Access Catalogue (OPAC) is provided at the entrance of the library for searching the availability of library materials. Searching can be done through author, title, subject and any other related words. The same facility is provided to all the Head of the departments for searching library materials at their location through LAN.

**i. Simple Search** -(for beginners)- to search the database using important fields such as Accession Number, Call Number, Author, Title, Edition, Year, Publisher, Subject, Keywords, Department, Availability, etc.

**ii. Advanced Query Builder** ( for experienced users) – to search the database by selecting the desired **field(s),criteria for search** (starting with, anywhere(like), truncation, word), **Boolean Operators**(AND, OR, NOT) and **sorting order** from a list of fields and printing in various formats

**iii. Restricted Search** – to search letter by letter
