**Group Discussion**

**Introduction:**

Group discussion is a centered strategy, in which students are divided into groups and they are encouraged to discuss on the subject matter given. Group discussion is dominated by the faculty. Classroom climate is autocratic and most of the time, faculty is active and student accept his/her ideas and views.

It includes setting, or helping the group to set the discussion topic, fostering the open process, involving all participants, asking questions or offering ideas to advance the discussion, summarizing or clarifying important points, arguments, ideas and wrapping up the session.

**Topic:**

- Types of Design patterns

**Objective of the Activity:**

- Collecting data.
- Breeding fresh ideas and taking inputs from a particular group.
- Perception of common people on a particular topic.
- Identifying a solution to a specific problem or issue.
- To evaluate the speaking power.
- Thinking and listening abilities and logical approach for a particular topic.

**Execution Plan:**

- All members of the group have a chance to speak, expressing their own ideas and feelings freely, and to pursue and finish out their thoughts.

- All members of the group can hear others' ideas and feelings stated openly.
- The discussion should not be dominated by any one person.

### **Expected Outcomes:**

The students can be able to:

- Understand the various design patterns
- Apply the various design patterns

### **Enclosures**

- Attached activity photos
- Participating Teams

### **Important Observations:**

- Some Students were not able to communicate in English.
- More students were spoke good about the topics
- They need more sessions for better improvement of their communication skills.
