

Central Library and Information Centre

Integrated Library Management System (ILMS)

A library system is a set of interrelated online services that allow libraries to provide access and help people make effective use of library information. Library system was developed to provide electronic services and resources to library users, both staff and students. The new development has become known as an Integrated Library Management System (ILMS) and it is a backbone for libraries.

An Integrated Library Management System (ILMS) is a set of software components that work together to provide library staff and students with a single point of access to all of the resources a library has to offer.

An integrated library system is accessed through software, either on-premises or cloud-based. ILMS serves as a centralized repository for library content, which may include books, Journals, Magazines, Project Record details and other resources. The primary purpose of an ILMS is to save you time and effort by providing one centralized location where staff and students can perform any library-related tasks. Integrated Library Management Systems (ILMS) relieve librarians of the burden of maintaining separate systems for each service and create a more streamlined, user-friendly environment. This makes it easier for the library staff and students to find the information they need when they need it.

Cataloguing and collection management is an essential feature of a library system. It is used to add information to the library database and these bits of information are stored in MARC format.

The circulation module keeps track of when items are checked in or out, their location in the library, and automatically sends notifications to patrons as emails or text messages.

Online Public Access Catalogue (OPAC): Integrated library systems have OPACs that allow staff and students to access the system's interface. This way, it is possible to manage accounts.

Cost Effective: An ILMS reduces costs by reducing the number of separate systems required to operate a modern library. It also reduces the workload of staff by simplifying and streamlining operations.

OPAC

The computerised bibliographic details of the books, CDs, Back Volumes of Journals are available in the library through the OPAC (On-line Public Access Catalogue) service. The two OPAC terminals are placed at the entrance of the library. Further the users can access the OPAC on intra-net through the web based OPAC module by pasting the links given below.

2. Search (OPAC)

This module is designed to search all the **above databases** using important fields and print the search results in any desired format/order.

Online Public Access Catalogue (OPAC) is provided at the entrance of the library for searching the availability of library materials. Searching can be done through author, title, subject and any other related words. The same facility is provided to all the Head of the departments for searching library materials at their location through LAN.

i. Simple Search -(for beginners)- to search the database using important fields such as Accession Number, Call Number, Author, Title, Edition, Year, Publisher, Subject, Keywords, Department, Availability, etc.

ii. Advanced Query Builder (for experienced users) – to search the database by selecting the desired **field(s), criteria for search** (starting with, anywhere(like), truncation, word), **Boolean Operators**(AND, OR, NOT) and **sorting order** from a list of fields and printing in various formats

iii. Restricted Search – to search letter by letter

4. Report Management

This module is designed to generate and print a large number of reports such as: List of books by author, title, unique titles publisher, supplier, call number, subject, dept, accession number, date, book type and list of journals/publishers/suppliers/members, etc. It also allows to print accession register, catalogues, amount spent by type of documents/departments/subjects and bibliographic reports. All types of statistics/reports for the management can be generated for AICTE/NBA,UGC/NAAC, IMC.

The screenshot shows the library management system interface for Geethanjali Institute of Science and Technology. The browser address bar shows the URL: 192.168.60.1:8080/AutoLib/Home/index.jsp. The page header includes the date and time: 7 Jan 2021, 09:17:19, and the system is powered by AutoLib Software Systems. The user is logged in as ADMIN.

The navigation menu includes: Home, Master, Cataloguing, Circulation, Serial Control, Acquisition, Admin, Search, Gate, Reports, Logout. The 'Reports' menu is open, showing the following options: Library Collection, Accession Register, Bibliography Report, Counter Report, Statistics, Database Report, Member Report, Payment Report, Journal Reports >>, Indent Reports >>, No Dues (0), Resource, Budget Report, UserLog Report, Library Login, SpineLabel, Transfer Report, Unique Title Report, MissingResourceReport.

The main content area displays the following statistics:

- Total Collection and Transaction Details:**
 - Collection (39222)
 - Member (4598)
 - Due List (913)
 - Issued List (926)
 - Returned List (79322)
 - Renewed List (0)

5. System Administration

This module allows to:

- Create new user log-in, password and grant **rights** to access various modules
- Create group master – to set due date, allowed cards for different documents for different groups of users globally
- Set over due charge at various stages/holiday
- Maintain budget master
- Back-up, export and import of data
- Update database globally using various fields
- Generate charts

The screenshot displays the library management system interface for Geethanjali Institute of Science and Technology. The page is titled "Geethanjali Institute of Science and Technology" and is powered by AutoLib Software Systems. The user is logged in as ADMIN, and the date and time are 7 Jan 2021, 09:22:14.

The navigation menu includes: Home, Master, Cataloguing, Circulation, Serial Control, Acquisition, Admin, Search, Gate, Reports, Logout. The "Admin" menu is expanded, showing options: Login, Fine, Group, Budget, Stock, Holiday, Week End Holidays, Email/Sms Reminder, Import, Updation, Trans Master, Member Transfer, Ref.Due Days, Msg Master, Backup.

The sidebar shows user details for the logged-in user (ADMIN):

7. Online Stock Verification

This module allows for online stock verification of library resources using Barcode Scanner, Data Capturing Unit and generate reports of books such as - missing, lost, issued, binding, transferred condemned, available, etc.

Advanced Modules

8. Acquisition Control System (Book Ordering)

This module is designed to automate various activities involved in book ordering & processing.

Features

- Indent - request for new books (manual/online), checking for duplicates
- Approval, processing, book ordering
- Receipt of documents and invoice processing
- Order follow-up, payment to suppliers
- Budgeting and accounting
- Transfer the processed indents to database
- Status reports, vendor information, etc.

9. Serial Control System (Journals)

This module is designed to automate various activities involved in subscription of journals.

Features

- Creation and maintenance of journal master
- Enquiry and approval of journals
- Subscription /renewal of journals
- Invoice processing, payment
- Receipt of issues and entry (like Kardex)
- Claiming missing issues/replacement
- Browsing/searching issues
- Bound volumes , bindery management, etc

10. Article Indexing

This module allows to create and maintain journal articles database. It also allows to search and retrieve data based on several fields/criteria.

11. Question Bank

This module allows to create and maintain question banks and retrieve questions

12. Student E-Gate

Library users log-in to the library through e-gate at the entrance of the library. While entering in to the library, users can scan their Roll number (Scanning of ID Roll no. with Barcode) with the scanner provided at the entrance of the library and log-out while returning from the library. Reports will be generated on usage of the library.

5. Counter Report: Report on daily transaction such as Issue, Return, Renewal and Due Reminder will be generated by date wise. Sorting is possible on fields.

The screenshot shows the library system's 'COUNTER REPORTS' page. At the top, there is a navigation menu with options like Home, Master, Cataloguing, Circulation, Serial Control, Acquisition, Admin, Search, Gate, Reports, and Logout. The current page is titled 'COUNTER REPORTS' and features several filter options: Issue, Return, Renewal, Reserve, Res.Reminder, Due Reminder, and Fine. Below these are input fields for Member Code, Access No, Date From (01-11-2020), Date To (06-01-2021), Group, and Department, each with a 'Find' button. There are also dropdown menus for 'Order By' and 'Report Type' (set to Listing). At the bottom of the form area, there are buttons for 'Delete Old Transaction', 'Report', 'Chart', and 'Clear'.

The screenshot shows an Excel spreadsheet titled 'Issue-Report_Excel'. The data is organized into columns for Member Code, Member Name, Access No, Title, Issue Date, Due Date, Return Date, Document Type, and Staff Code. The report covers the period from 01-11-20 to 06-01-21. The document type is set to 'ALL'. The data includes various book titles such as 'Strength of Materials', 'Managerial Economics and Finance', and 'Concrete Technology: Theory and Practice'.

Member Code	Member Name	Access No	Title	Issue Date	Due Date	Return Date	Document Type	Staff Code
