		POWER ELE	CTRONICS AND DR	RIVES	
Course Code	L:T:P	Credits	Exam marks	Exam Durat	ion Course Type
22A0222T	3:0:0	3	CIE:30 &SEE:70	3 Hours	PCC
Course Objectives	•				
Student wil	l be able to				
To understar	nd the basic prin	nciples of all ind	lustrial drives.		
To understat	nd the basic con	ncepts of contro	l of dc motors.		
• To analyze S	Speed-torque ch	naracteristics.			
To understat	nd the performa	nce of induction	n motor.		
To understat	nd the performa	ince of synchron	nous motor.		
Syllabus					Total Hours:48
Unit-I	INT	FRODUCTION	N TO INDUSTRIAL	DRIVES	10Hrs
Electrical Drives,	Advantages of	Electrical driv	es, Parts of Electrica	l Drives, Choic	e of electrical Drives,
Fundamental torque	e equation, mul	ti-quadrant ope	ration, Components of	load torques, N	ature and classification
of load torques, Bra	uking of DC mo	tor-Dynamic br	aking, plugging and re	generative braki	ng
	CON	FDOL OF DC	MOTODS DV SINCI		
Unit-II	CON	I KOL OF DC	MUTUKS DI SINGI ONVERTERS	LE PHASE	10Hrs
Controlled Convert	er Fed DC Mot	or Drives 1-ph	use half and fully contr	rolled converter	fed separately and self-
excited DC motor	drive – Output	voltage and cu	rrent waveforms – Sr	eed-torque expr	ressions – Speed-torque
characteristics — P	rinciple of oper	ration of dual co	onverters and dual con	verter fed DC n	notor drives -Numerical
problems.	I I I I I				
L					
Unit -III	СО	NTROL OF C	HOPPER-FED DC M	IOTORS	8Hrs
Single quadrant, Ty	wo quadrant and	d four quadrant	chopper fed dc separa	ately excited and	d series excited motors,
Continuous current	operation, Out	put voltage and	current wave forms, S	Speed torque exp	pressions, Speed-torque
characteristics, Prol	olems on Chopp	per fed D.C Mot	tors, Closed loop operation	ation.	
Unit -IV	(CONTROL OF	INDUCTION MOT	OR	10Hrs
Closed loop operati	on of induction	motor drives ,S	tatic rotor resistance c	ontrol-rotor resis	stance variation in slip
ring Induction moto	or using a chopp	er. Slip power	recovery scheme, Stati	c Kramer Drive	- performance and
speed torque charac	teristics. Advar	ntages. Doubly f	fed Induction Generato	r-Principle of or	peration - Applications.
Numerical problem	s				,
Unit -V		ONTROL OF	SVNCHRONOUS M	OTORS	10Hrs
Separate control &	self-control o	of synchronous	motors Operation of	f self-controlled	synchronous
motors by VSI & C	SI Load comm	utated CSI fed	Synchronous Motor (Departion Wave	forms Speed-
torque characteristi	cs. Application	s. Advantages	and Numerical Proble	ems. Closed-looi	o control
operation of synchro	onous motor dr	ives, Variable fi	requency control, Cycle	o-converter, PW	M.
Course Outcomes((CO):				
On completion of t	his course stud	lent will he ahl	e to		
Analyse DC	" motor drive fe	d from phase co	ontrolled converters		
Understand	DC motor driv	e fed from Cho	nner		
Apply AC	voltage Control	ler fed to Induc	tion motor.		
Analyse In	duction motor f	ed from VSI an	d CSL		
Analyse Syl	nchronous moto	or drive fed from	n VSI. CSI & Cyclo co	onverter.

		DIGITA (Cor	L SIGNAL PROCESSI nmon to ECE and EEE	NG			
Course Code	L:T:P	Credits	Exam marks	Exam Durat	ion	Course Type	
22A0435T	3:0:0	3	CIE:30& SEE:70	3 Hours PCC			
Course Objectives:							
The objectives of the	ne course are	to make the stu	dents learn about:				
• To describe dis	crete time sig	nals and system	18.				
• To teach impor	tance of FFT	algorithm for c	omputation of Discrete F	ourier Transform	1.		
 To expose varie 	ous implemer	ntations of digita	al filter structures.				
• To present FIR	and IIR Filte	r design proced	ures.				
• To outline need	l of Multi-rate	e Processing					
Syllabus					Total I	Hours: 48Hrs	
Unit-I	INT	RODUCTION	FO DISCRETE TIME SI SYSTEMS	GNALS AND		10Hrs	
Introduction to digi	ital signal pro	cessing, review	of discrete-time signals	and systems, and	alysis of	discrete-time	
linear time invariar	nt systems, fro	equency domain	n representation of discret	te time signals ar	nd syster	ms, analysis of	
linear time-invaria	nt systems in	the z-domain, p	ole-zero stability.				
Unit-II	DIS	CRETE FOURI	ER TRANSFORM & FAS FRANSFORM ING	ST FOURIER		9Hrs	
Discrete Fourier '	 Transform -	Introduction.	Discrete Fourier Series.	properties of DI	FS. Disc	crete Fourier	
Transform. Inverse	DFT. proper	ties of DFT. Li	near and Circular convolution	ution. convolutio	on using	DFT.	
Fast Fourier Tra	nsform - I	ntroduction. Fa	st Fourier Transform.	Radix-2 Decim	ation in	n time and	
Decimation in freq	uency FFT. In	nverse FFT (Ra	dix-2).				
Unit -III		~	UD FU TEDS			10Hrs	
IID Filtons Introdu	ution to digit	al filtara Anala	IIK FILTERS	Duttorworth on	d Chaby	when Design of	
IIR Digital filters fit transformations, Ba	rom analog fi asic structure	liters by Impulse s of IIR Filters -	e invariant and bilinear tr Direct form-I, Direct fo	cansformation me rm-II, Cascade f	ethods, i orm and	Frequency Parallel form	
Unit -IV			FIR FILTERS			10Hrs	
FIR Filters-Introd	uction, Chara	cteristics of FIF	R filters with linear phase	, Frequency resp	onse of	linear phase FIR	
filters, Design of F Cosine, Hanging, H form, Cascade form	IR filters usir Iamming, Bla n. Linear pha	ng Fourier series ackman), Comp se realizations.	s and windowing method arison of IIR & FIR filter	s (Rectangular, rs, Basic structur	Friangula es of FII	ar, Raised R Filters – Direct	
Unit -V	M	ULTI RATE D	DIGITAL SIGNAL PRO	DCESSING		9Hrs	
Multi rate Digita	l Signal Pro	ocessing: Decir	nation, Interpolation, Sa	ampling rate con	nversion	by a	
rational factor; Free	quency doma	in characterizat	ion of Interpolator and D	ecimator; Applic	ations.	5	
Course Outcomes(C After the completion • Understand t • Formulate di • Apply FFT a • Compare FII • Design digita • Understand t	CO): of the course the basic conce fference equatilgorithms for of and IIR filter al filter (FIR & he concept of	students will able epts of discrete tin tions for the given determining the I structures z IIR) from the gi multi rate DSP as	e to: me signals and systems. n discrete time systems DFT of a given signal ven specifications nd applications of DSP

- 4. Electrical Measurements by Forest K. Harris. John Wiley and Sons
- 5. Electrical Measurements: Fundamentals, Concepts, Applications by Reissland, M.U, New Age International (P) Limited, Publishers.

Electrical and Electronic Measurements by G.K.Banerjee, PHI Learning Private Ltd, New Delhi–2

<u> </u>		DENEW	A DI E ENEDOV SALID	CES	
		KENEW. (P	ABLE ENERGY SOUR rofessional Elective-I)	CES	
Course Code	L:T:P	Credits	Exam marks	Exam Durat	ion Course Type
22A0223T	3:0:0	3	CIE:30& SEE:70	3 Hours	PEC
Course Objectives:					
The objectives of the	ne course are	to make the stud	dents learn about:		
It introduces solar e	energy its radi	ation, collection	n, storage and application	. It also introduce	es the Wind energy,
Biomass energy, G	eothermal ene	ergy and ocean	energy as alternative ener	gy sources.	
Syllabus					Total Hours:48
Unit-I		PRINCIP	LES OF SOLAR RADIAT	TION	10Hrs
Role and potential of	of new and re	newable source	, the solar energy option,	Environmental in	npact of
solar power, physic	s of the sun, t	he solar consta	nt, extraterrestrial and ter	restrial solar radia	ation, solar radiation on
titled surface, instru	uments for me	easuring solar ra	adiation and sun shine, so	lar radiation data	
Unit-II	SO	LAR ENERGY	COLLECTION AND APP	PLICATIONS	IOHrs
Flat plate and conce	entrating colle	ectors, classific	ation of concentrating col	lectors, orientatio	on and thermal analysis,
advanced collectors	S Different m	ethods, Sensibl	e, latent heat and stratified	d storage, solar po	onds. Solar Applications-
solar neating/coolir	ig tecnnique,	solar distillation	h and drying, photovoltaid	c energy conversion	on.
Unit -III		WIND A	AND BIO-MASS ENERG	GΥ	8Hrs
Sources and potent:	ials, horizonta	al and vertical a	xis wind mills, performar	nce characteristics	s Principles of Bio-
Conversion, Anaero	obic/aerobic d	ligestion, types	of Bio-gas digesters, gas	yield, combustion	n characteristics of bio-
gas, utilization for o	cooking, and e	economic aspec	ts.		
Unit -IV		GEOTHER	RMAL AND OCEAN ENI	ERGY	10Hrs
Resources, types of	wells, metho	ds of harnessin	g the energy, potential in	India Principles u	tilization, setting of
OTEC plants, thern	nodynamic cy	cles. Tidal and	wave energy: Potential an	nd conversion tec	hniques, mini-hydel
power plants and th	eir economic	S		1	
Unit -V		DIREC	<u>FENERGY CONVERSION</u>	DN	10Hrs
Direct Energy Con	version: Direc	t Energy Conv	ersion (DEC), Need for L	DEC, Types of DE	C - Fuel
treatment only) W	nyarogen iue.	l cell Magneto	Hydro Dynamic Energy	Conversion (MI	aD elementary
(reatment only), wo	Jiking Finicip	ne, Auvantages	anu Disauvantages		
Course Outcomes(C	CO):				
At the end of studyir	ng the course, t	he student shou	d be able to:		
• Und	erstand the er	ergy scenario a	and the consequent growth	h of the power ger	neration from renewable
ener	gy sources.				
• Esti	mate the solar	energy Utiliza	tion of solar energy. Prin	ciples involved in	solar energy collection
and	conversion of	it to electricity	generation		
• Und	eventeend the ac	n to chectricity	and Diamaga anargy rasa	urace and their al	aggification types Dlants
• Ulid	issticns	incept of white	and Diomass energy reso	unces and then ch	assincation, types r lants-
appi	ications				
• Acq	uire the know	ledge on Geoth	ermal energy and it's har	nessing methods	
• Illus	trate ocean er	nergy and expla	in the operational method	ls of their utilizati	on
• Desc	cribe the conc	ept of direct en	ergy conversion and their	types and working	ng principle
Textbooks:	<u></u>	g			D 11' 1

	INTRODU	CTION OF PI (Pr	ROGRAMMABLE LO ofessional Elective-I)	GIC CONTROI	LLER
Course Code	L:T:P	Credits	Exam marks	Exam Durat	ion Course Type
22A0224T	3:0:0	3	CIE:30 &SEE:70	3 Hours	PEC
Course Objectives:					
The objectives of the	he course are	to make the stu	dents learn about:		
• PLC and its bas	sics, architect	ure, connecting	devices and programmin	ıg	
• Implementatio	n of Ladder lo	ogic for various	Industrial applications	-	
• Designing of c	ontrol circuits	s for various ap	plications		
PLC logic and	arithmetic ope	erations.			
Syllabus					Total Hours: 48Hrs
Unit-I		INTROD	UCTION TO PLC BASI	CS	10Hrs
PLC Basics: PLC S	System, I/O M	Iodules and Inte	erfacing, CPU Processor,	Programming Ed	quipment, Programmin
Formats, Construct	tion of PLC L	adder Diagram	s, Devices Connected To	I/O Modules. PI	C Programming: Inpu
Instructions, Outpu	its, Operation	al Procedures, I	Programming Examples	Using Contacts a	nd Coils. Drill Press
Operation.	I			1	
Unit-II		LOGIC GAT	'ES AND IT'S APPLICA'	LIONS	10Hrs
Digital Logic Gate	s, Programmi	ng in the Boole	an Algebra System, Con	version Example:	s. Ladder Diagrams for
Process Control: La	adder Diagrar	ns & Sequence	Listings, Ladder Diagrai	m Construction a	nd Flowchart for Spray
Process System				Γ	
Unit -III			REGISTERS		9Hrs
PLC Registers: Ch	aracteristics of	of Registers, Mo	odule Addressing, Holdin	ng Registers, Inp	ut Registers, Output
Registers. PLC Fur	nctions: Time	er Functions &	Industrial Applications,	Counter Function	n & Industrial
Applications, Arith	metic Function	ons, Number Co	omparison Functions, Nu	mber Conversion	Functions.
Unit -IV		DATA I	HANDLING FUNCTION	S	9Hrs
Data Handling Fun	ctions: SKIP,	, Master Contro	l Relay, Jump, Move, FI	FO, FAL, ONS,	CLR & Sweep Function
and Their Applica	tions. Bit Pat	ttern and Chan	ging a Bit Shift Registe	er, Sequence Fun	ctions and Applicatio
Controlling of Two	o-Axis & Thre	e Axis Robots	With PLC, Matrix Funct	ions.	
Unit -V			ANALOG PLC		10Hrs
Analog PLC Opera	tion, Types o	f PLC Analog I	Modules and Systems, PI	LC Analog Signa	l Processing, BCD or
Multi bit data Proc	essing, Analo	g output applic	ation examples, PID Mo	dules, PID Tunin	g, Typical PID
Functions, PLC Ins	stallation, Tro	ubleshooting ar	nd Maintenance.		
Course Outcomes(C	C O):				
At the end of studyin	ng the course, t	he student should	l be able to:		
Understand	different type	es of Devices to	which PLC input and or	utput modules are	e connected
Understand	various types	s of PLC registe	ers and create ladder diag	grams from proce	ess control descriptions
Use different	nt types PLC	functions, Data	Handling Function		
Develop a c	coil and conta	ct control syste	m to operate a basic robo	t and analog PLC	² operations
> Implementa	ation of PLC	in analogue one	erations, arithmetic, logic	functions.	1
 Understand 	the PID mod	ule installation	procedure and maintena	nce	
	the FID mod	ule, instantion	procedure and maintena	lice

Information Syste	m								
Course Outcomes	s(CO):								
On completion of t	this course, stude	ent will be able t	0:						
CO1: To understa	and the character	istics of differer	t building materials.						
CO2: Differentiate brick masonry, stone masonry construction and bonds used in construction of walls of									
buildings.									
CO3: To know about the causes of dampness in buildings and its ill effects.									
CO4: To understand the principles of planning in buildings.									
CO5: Describe capable of understanding building rules.									
CO6: Acquire the	knowledge abou	it bye-laws and	building elements.

Course Outcomes (CO):

On completion of this course, student will be able to:

CO1: Understand the Basic Concepts of Database languages, Relational model, SQL.

CO2: Choose the specific Data models for large enterprise database design.

CO3: Analyze the data efficiently through SQL instructions.

CO4: Apply Normal forms on database for eliminating the redundancy.

CO5: Demonstrate the Basic Concepts of transaction management techniques.

CO6: Apply concurrency control techniques for Database recovery.

		DIGITAL	SIGNAL PROCESSIN	G LAB	
Course Code	L:T:P	Credits	Exam marks	Exam Duration	Course Type
22A0442P	0:0:3	1.5	CIE:30& SEE:70	3 Hours	PCC
Course Objective	s:				
• Formula	te problems a	and implement	algorithms using Assemb	ly language.	
Develop	programs for	different appli	ications.		
Interface	e peripheral de	evices with 808	36 and 8051.		
• Use Ass	embly/Embec	Ided C program	nming approach for solvi	ng real world problems	
	ints : (Condu	ict an experim	ents).		
Note: Any TV	WELVE of th	ne experiment	s are to be conducted.		
1. Generate th	ne following s	tandard discret	e time signals.		
i)Unit Impulse	e ii) Unit step	iii) Ramp iv) I	Exponential v) Saw tooth		
2. Generate su	um of two sin	usoidal signals	and find the frequency re	esponse (magnitude and	d phase).
3. Implement	and verify lin	lear and circula	r convolution between tv	vo given signals.	1 /
4. Implement	and verify au	tocorrelation for	or the given sequence and	d cross correlation bety	veen two given
signals.	5				U
5. Compute a	nd implement	t the N-point I	OFT of a given sequence	and compute the pow	er density spectrum
of the seque	ence.	Ĩ		1 1	V 1
6. Implement	and verify N-	-point DIT-FF	T of a given sequence an	d find the frequency re	esponse (magnitude
and phase).		-	0		
7. Implement	and verify N-	-point IFFT of	a given sequence.		
8. Design IIR	Butterworth	filter and con	mpare their performance	s with different order	s (Low Pass Filter
/High Pass	Filter)				
9. Design IIR	Chebyshev fi	ilter and compa	are their performances with	ith different orders (Lo	w Pass Filter /High
Pass Filter)					
10. Design FIF	R filter (Low	Pass Filter /H	ligh Pass Filter) using d	lifferent window techr	iques (rectangular,
hamming a	nd Kaiser)				
11. Design and	verify Filter	(IIR and FIR)	frequency response by us	ing Filter design and A	nalysis Tool.
12. Compute th	ne Decimation	and Interpolat	tion for the given signal.		
13. Real time in	mplementatio	n of an audio s	ignal using a digital signa	al processor.	
14. Compute th	he correlation	coefficient for	r the two given audio sig	gnals of same length us	sing a digital signal
processor.					
Course Outcomes	s (CO):	1 / 111 1	1 /		
At the end of the co	ourse, the stud	aent will be abl	le to:		
 Implement Implement 	t DSP algorit	hms with Digit	al Signal Processor		
Analyze a	ndobservema	gnitude and ph	ase characteristics (Frequ	iency response Charact	eristics) of digital
IIR-Butter	rworth filters.	Sincute and ph	ase enaractoristics (110qt	ioney response charact	ensues, or uightar
Analyze a	ndobserve m	agnitudeand pl	nase characteristics (Freq	uency response Chara	cteristics) of digital
IIR- Cheb	yshev filters.	- 1	`		
 Analyze a 	ndohservema	onitudeandnha	se characteristics (Freque	ency response Characte	ristics) of digital

- Analyze and observe magnitude and phase characteristics (Frequency response Characteristics) of digital FIR filters using window techniques.
- Analyze and implement various digital filters.

MATLAB APPLICATIONS IN ELECTRICAL ENGINEERING LAB								
Course Code	L:T:P	Credits	Exam marks	Exam Duration	Course Type			
22A0226P	1:0:2	2	CIE:30& SEE:70	3 Hours	SC			
Course Objectives:								
This course will enable students to:								
1. Understand the basic concepts of Electrical Engineering.								
2. Analyze various Electrical engineering applications through MATLAB/PSPICE.								
3. Develop re	3. Develop real time models using MATLAB/PSPICE.							
List of Experimer	nts:							
1. Transient a	inalysis of giv	en electrical net	work					
2. Simulation	of 1-phase an	a 3-phase trans	Tormers					
3. Study of the	e dynamics of	and boost do do	system					
5 Study on th	actor of Duck a	I controllers and	l stability analysis for a I	C-DC buck Converter				
6 Sine-PWM	techniques fo	or single-phase l	half-bridge full-bridge a	nd three-phase inverter	S			
7. Economic	Load Dispatch	h of (i) Thermal	Units and (ii) Thermal P	lants using Conventior	al method			
8. Transient S	Stability Analy	vsis of Power Sv	stems using Equal Area	Criterion (EAC)				
9. Reactive P	ower Control	in a transmissio	n system (Ferranti effect	, Effect of shunt Induct	or)			
10. Fault studie	es using Zbus	matrix	•					
11. Design of v	virtual PMU							
12. Wide area	control of Two	o area Kundur	system					
13. Design usin	ng Battery Ma	inagement syste	m (BMS) using MATLA	AB				
14. Using MA	TLAB and Sir	nulink design P	ID Controllers					
15. Using MA converter	TLAB and Sir	mulink Design a	and control the speed of a	Brushless DC motor u	ising Boost			
16. Design usin	ng MATLAB	and Simulink c	ontrolling the speed of th	e electric traction moto	or and the torque.			
17. Design Up	counter and d	lown counter us	ing MATLAB Simulink					
18. Design a pr	rototype Fuel	cell electric veh	icle using Simulink Too	l and control the speed,	Torque,Voltage			
19. Design Up	counter and d	lown counter us	ing Stateflow tool					
20. Design Alg	gebraic Loop a	and Limit the alg	gebraic loop & Saturation	n using Min/Max Simu	link			
21. Modeling a	and controlling	g of different ty	pes of DC motor using cl	hoppers				
22. Design Sim	hulink Model	using mathemat	tions design a DC Moto	and third order	ool			
25. By using el	lectrical and N	hechanical equa	ations, design a DC Moto	or by using Simscape 1	001			
(Any 10 experiments from the above list)								
Course Outcomes	s (CO):							
At the end of the c	ourse, the stud	dent will be able						
• Understand the basic concepts of Electrical Engineering.								
• Apply the concepts to design MATLAB models.								
• Analyze v	arious Electri	cal engineering	applications through MA	AILAB.

		COMMU Experiential la	INITY SERVICE PROJE	CCT ty engagement	
Course Code	 І.·Т·Р	Credits	Fxam marks	Exam Duration	Course Type
22A0227P	0:0:0	1.5	CIE:30& SEE:70	3 Hours	PC
Introduction	0.0.0	1.0		J Hours	10
Commun	nity Service	Project is an	experiential learning st	rategy that integrates	meaningful
commun	ity service w	ith instruction, J	participation, learning an	d community develop	ment.
Commun	nity Service I	Project involves	students in community	development and servi	ce activities
and appl	ies the experi	ence to persona	al and academic developr	nent.	
Commun	nity Service I	Project is meant	to link the community v	with the college for mu	itual benefit.
The com	imunity will t	benefit with the	tocused contribution of	the college students for	r the village/
local de	velopment. I	ne college find	is an opportunity to dev	which is a set of the	and
Objectives	onity among	students and en	lerge as a socially respon	sidle institution.	
Community Ser	vice Project	should be an i	integral part of the curr	joulum as an alternat	ive to the ?
months of Sum	ner Internshi	ns / Apprentice	ships / On the Job Traini	ing whenever there is	an exigency
when students c	annot pursue	their summer in	ternships. The specific	objectives are:	an exigency
To sensitize	the students	to the living cor	ditions of the people who	o are around them.	
• To help stu	dents to realiz	the stark realize	ties of society.	,	
• To bring at	out an attitud	linal change in t	he students and help the	m to develop societal c	onsciousness,
sensibility,	responsibility	and accountab	ility	I	,
• To make st	udents aware	of their inner s	strength and help them to	o find new /out of box	solutions to social
problems.					
• To make s	students socia	ally responsible	citizens who are sense	itive to the needs of	the disadvantaged
sections.					-
• To help stu	idents to init	iate developme	ntal activities in the cor	nmunity in coordination	on with public and
governmen	t authorities.				
To develop	a holistic life	e perspective an	nong the students by mak	king them study culture	e, traditions, habits,
lifestyles, r	esource utiliz	zation, wastages	s and its management, so	cial problems, public a	administration
system and	the roles and	responsibilities	of different persons acro	oss different social syst	ems.
Implementation of	f Community	Service Project	ct		
• Every stud	ent should p	out in 6 weeks	for the Community Se	ervice Project during	the summer
vacation.					
• Each class/s	section should	l be assigned wi	th a mentor.		
Specific De	epartments co	ould concentrate	e on their major areas o	of concern. For examp	ole, Dept. of
Computer	Science can	take up activiti	ies related to Computer	Literacy to different	sections of
people like	- youth, won	hen, housewives	s, etc		/ 1 1 /
A logbook be recorded	must be main l.	itained by each	of the students, where th	e activities undertaken	/involved to
The logboo	k has to be co	untersigned by	the concerned mentor/fac	culty in charge.	
• An evaluat	ion to be do	ne based on th	ne active participation o	f the student and grad	de could be
awarded by	the mentor/f	aculty member.			
• The final ev	aluation to b	e reflected in the	e grade memo of the stud	ent.	
• By using el	ectrical and N	Aechanical equa	ations, design a DC Moto	or by using Simscape T	ool
• The Com	munity Serv	vice Project s	should be different f	rom the regular p	rograms of
INSS/INCC/	Green Corps/	kea Kibbon Clu	ID, etc.	intornal Vivo aball -1	a ha
 willior projected 1 	by a committe	e constituted by	the principal of the coll	internar viva snall als	
Award of n	harks shall be	made as per the	e guidelines of Internshin	/apprentice/ on the job	training

Procedure

- A group of students or even a single student could be assigned for a particular habitation or village or municipal ward, as far as possible, in the near vicinity of their place of stay, to enable them to commute from their residence and return back by evening or so.
- The Community Service Project is a twofold one –
- First, the student/s could conduct a survey of the habitation, if necessary, in terms of their own domain or subject area. Or it can even be a general survey, incorporating all the different areas. A common survey format could be designed. This should not be viewed as a duplication of work by the Village or Ward volunteers, rather, it could be another primary source of data.
- Secondly, the student/s could take up a social activity, concerning their domain or subject area. The different areas, could be like
 - Agriculture
 - Health
 - Marketing and Cooperation
 - Animal Husbandry
 - Horticulture
 - Fisheries
 - Sericulture
 - Revenue and Survey
 - Natural Disaster Management
 - Irrigation
 - Law & Order
 - Excise and Prohibition
 - Mines and Geology
 - Energy
 - Internet
 - Free Electricity
 - Drinking Water

EXPECTED OUTCOMES

BENEFITS OF COMMUNITY SERVICE PROJECT TO STUDENTS

Learning Outcomes

- Positive impact on students' academic learning
- Improves students' ability to apply what they have learned in "the real world"
- Positive impact on academic outcomes such as demonstrated complexity of understanding, problem analysis, problem-solving, critical thinking, and cognitive development.
- Improved ability to understand complexity and ambiguity

Personal Outcomes

- Greater sense of personal efficacy, personal identity, spiritual growth, and moral development
- Greater interpersonal development, particularly the ability to work well with others, and build leadership and communication skills.

Social Outcomes

- Reduced stereotypes and greater inter-cultural understanding
- Improved social responsibility and citizenship skills
- Greater involvement in community service after graduation

Career Development

- Connections with professionals and community members for learning and career opportunities
- Greater academic learning, leadership skills, and personal efficacy can lead to greater opportunity.

Relationship with the Institution

- Stronger relationships with faculty
- Greater satisfaction with college
- Improved graduation rates

BENEFITS OF COMMUNITY SERVICE PROJECT TO FACULTY MEMBERS

- Satisfaction with the quality of student learning
- New avenues for research and publication via new relationships between faculty and community
- Providing networking opportunities with engaged faculty in other disciplines or institutions
- A stronger commitment to one's research.

BENEFITS OF COMMUNITY SERVICE PROJECT TO COLLEGES AND UNIVERSITIES

- Improved institutional commitment.
- Improved student retention
- Enhanced community relations

BENEFITS OF COMMUNITY SERVICE PROJECT TO COMMUNITY

- Satisfaction with student participation
- Valuable human resources needed to achieve community goals.
- New energy, enthusiasm and perspectives applied to community work.
- Enhanced community-university relations.

SUGGESTIVE LIST OF PROGRAMMES UNDER COMMUNITY SERVICE PROJECT

The following the recommended list of projects for Engineering students. The lists are not exhaustive and open for additions, deletions, and modifications. Colleges are expected to focus on specific local issues for this kind of project. The students are expected to carry out these projects with involvement, commitment, responsibility, and accountability. The mentors of a group of students should take the responsibility of motivating, facilitating, and guiding the students. They have to interact with local leadership and people and appraise the objectives and benefits of this kind of project. The project reports shall be placed in the college website for reference. Systematic, Factual, methodical and honest reporting should be ensured.

For Engineering Students

- 1. Water facilities and drinking water availability
- 2. Health and hygiene
- 3. Stress levels and coping mechanisms
- 4. Health intervention programmes
- 5. Horticulture
- 6. Herbal plants
- 7. Botanical survey
- 8. Zoological survey
- 9. Marine products
- 10. Aqua culture
- 11. Inland fisheries
- 12. Animals and species
- 13. Nutrition
- 14. Traditional health care methods
- 15. Food habits
- 16. Air pollution
- 17. Water pollution
- 18. Plantation

- 19. Soil protection
- 20. Renewable energy
- 21. Plant diseases
- 22. Yoga awareness and practice
- 23. Health care awareness programmes and their impact
- 24. Use of chemicals on fruits and vegetables
- 25. Organic farming
- 26. Crop rotation
- 27. Floury culture
- 28. Access to safe drinking water
- 29. Geographical survey
- 30. Geological survey
- 31. Sericulture
- 32. Study of species
- 33. Food adulteration
- 34. Incidence of Diabetes and other chronic diseases
- 35. Human genetics
- 36. Blood groups and blood levels
- 37. Internet Usage in Villages
- 38. Android Phone usage by different people
- 39. Utilisation of free electricity to farmers and related issues
- 40. Gender ration in schooling lvel- observation.

Complementing the community service project the students may be involved to take up some awareness campaigns on social issues/special groups. The suggested list of programs

Programs for School Children

- 1. Reading Skill Program (Reading Competition)
- 2. Preparation of Study Materials for the next class.
- 3. Personality / Leadership Development
- 4. Career Guidance for X class students
- 5. Screening Documentary and other educational films
- 6. Awareness Program on Good Touch and Bad Touch (Sexual abuse)
- 7. Awareness Program on Socially relevant themes. Programs

for Women Empowerment

- 1. Government Guidelines and Policy Guidelines
- 2. Women's Rights
- 3. Domestic Violence
- 4. Prevention and Control of Cancer
- 5. Promotion of Social Entrepreneurship General

Camps

- 1. General Medical camps
- 2. Eye Camps
- 3. Dental Camps
- 4. Importance of protected drinking water
- 5. ODF awareness camp
- 6. Swatch Bharath
- 7. AIDS awareness camp
- 8. Anti Plastic Awareness
- 9. Programs on Environment
- 10. Health and Hygiene
- 11. Hand wash programmes
- 12. Commemoration and Celebration of important days Programs
- for Youth Empowerment
 - 1. Leadership

- 2. Anti-alcoholism and Drug addiction
- 3. Anti-tobacco
- 4. Awareness on Competitive Examinations
- 5. Personality Development Common

Programs

- 1. Awareness on RTI
- 2. Health intervention programmes
- 3. Yoga
- 4. Tree plantation
- 5. Programs in consonance with the Govt. Departments like
 - i. Agriculture
 - ii. Health
 - iii. Marketing and Cooperation
 - iv. Animal Husbandry
 - v. Horticulture
 - vi. Fisheries
 - vii. Sericulture
 - viii. Revenue and Survey
 - ix. Natural Disaster Management
 - x. Irrigation
 - xi. Law & Order
 - xii. Excise and Prohibition
 - xiii. Mines and Geology
 - xiv. Energy

Role of Students:

- Students may not have the expertise to conduct all the programmes on their own. The students then can play a facilitator role.
- For conducting special camps like Health related, they will be coordinating with the Governmental agencies.
- As and when required the College faculty themselves act as Resource Persons.
- Students can work in close association with Non-Governmental Organizations like Lions Club, Rotary Club, etc or with any NGO actively working in that habitation.
- And also, with the Governmental Departments. If the program is rolled out, the District Administration could be roped in for the successful deployment of the program.
- An in-house training and induction program could be arranged for the faculty and participating students, to expose them to the methodology of Service Learning.

Timeline for the Community Service Project Activity Duration: 8

weeks

1. Preliminary Survey (One Week)

- A preliminary survey including the socio-economic conditions of the allotted habitation to be conducted.
- A survey form based on the type of habitation to be prepared before visiting the habitation with the help of social sciences faculty. (However, a template could be designed for different habitations, rural/urban.
- The Governmental agencies, like revenue administration, corporation and municipal authorities and village secreteriats could be aligned for the survey.

2. Community Awareness Campaigns (One Week)

- Based on the survey and the specific requirements of the habitation, different awareness campaigns and programmesto be conducted, spread over two weeks of time. The list of activities suggested could be taken into consideration.
- 3. Community Immersion Programme (Three Weeks) Along with the Community Awareness Programmes, the student batch can also work with

any one of the below-listed governmental agencies and work in tandem with them. This community involvement programme will involve the students in exposing themselves to experiential learning about the community and its dynamics. Programs could be in consonance with the Govt. Departments.

4. Community Exit Report (One Week)

• During the last week of the Community Service Project, a detailed report of the outcome of the 8 weeks' works to be drafted and a copy shall be submitted to the local administration. This report will be a basis for the next batch of students visiting that habitation. The same report submitted to the teacher-mentor will be evaluated by the mentor and suitable marks are awarded for onward submission to the University. Throughout the Community Service Project, a daily logbook need to be maintained by the students batch, which should be countersigned by the governmental agency representative and the teacher-mentor, who is required to periodically visit the students and guide them.
